

Ribbon Loudspeakers

by Justus V. Verhagen

The first book dedicated to these great-sounding speakers. The author favors ribbons, especially for use at mid- and high-frequencies. They are inexpensive and can be easily constructed with a minimum of tools. The book presents the theory and history of ribbon speakers and includes construction details for building your own ribbon loudspeakers. An extensive resource section is included along with a detailed listing of ribbon loudspeaker patents. 2003, ISBN 1-882580-44-3. Sh. wt: 2 lbs.

NOW YOU CAN BECOME A SPEAKER BUILDER

with Speaker Building 201 by Ray Alden

Whether you're a beginner eager to get into speaker building, an intermediate builder who wants to improve his skills, or a speaker building fanatic who's looking for projects to build, author Ray Alden has written this book for you!

You don't need an elaborate workshop, expensive analytical equipment, or sophisticated software. Alden walks you through the steps to design and construct a first-rate system—one that surpasses higher-cost commercial products.

Features 11 proven projects to build, many of which have been tested by loudspeaker expert, Joseph D'Appolito.

2004, 8½ × 11, softbound, ISBN 1-882580-45-1. Shipping weight: 2 lbs.
