

New from **Dynakit**, the Mark III is a 60W mono amplifier kit featuring a non-magnetic "mirror polished" chassis, and a 600V (curve) rated quad capacitor of 80/40/30/20 $\mu$ F. The Mark III is also offered with an optional cover as well as either new production or NOS tubes. For more information, please visit [www.dynakitparts.com](http://www.dynakitparts.com).

**TEAC America Inc.**'s new hi-definition earphones, the Audio ZE-1000, feature patented 5-layer silicone ear pads and dual hi-definition balanced armature drivers. Four integrated micro speakers are included with the inCores, and there is an airtight seal within the ear canals. The listener is no longer forced to maximize volume, where ambient noise is high, keeping ears safe in the long run. The inCore Audio ear pads come in three sizes, and have 109dB sensitivity, 15 $\Omega$  impedance, and 20Hz-20kHz frequency response. For additional information, contact [www.teac.com/DSPD](http://www.teac.com/DSPD) or [mnguyen@teac.com](mailto:mnguyen@teac.com).

The Vienna 16 and Paris 616 loudspeakers, from **Technomad**, are part of the company's weatherproof MP Series, designed for permanent installation indoors and outdoors. Part of Version8's model series, they add compression drivers that provide an added 3dB of

maximum continuous SPL and an added 10dB of dynamic range. The upgrades are targeted toward outdoor applications where background noise is more likely to adversely affect audio output. For more information, visit [www.technomad.com](http://www.technomad.com).

Designed to listen to or restore cylinders, vertical-cuts, 78s, 45s, and early LPs, **TDL Technology, Inc.**'s "Restoration Preamp" (Model 4010) features a full range of turnover frequencies and rolloff attenuations. It contains five switch-selectable rumble filter frequencies and 11 selectable output lowpass filter frequencies. Maximum gain is set with two internal easily changed jumpers, and stereo input is 47k $\Omega$  for both the left and right channels. For more information e-mail [RTipton@tdl-tech.com](mailto:RTipton@tdl-tech.com).

**Mouser Electronics** signed 64 suppliers for the year 2007, representing all the major electronic product categories including semiconductors, optoelectronics, interconnects, and more. Some of the newer companies added to Mouser's lineup were SkyTek, Avago Technologies, Cypress Semiconductor, Delphi, and Pericom. To learn more, go to [www.mouser.com](http://www.mouser.com).

As the newest additions to **BG Radia's** Z-Series, the Z-92 and LCR Z-62 feature an advanced three-way design with unique coaxially mounted mid and high frequency planar ribbon drivers. The Z-92 is 44.25" high, with its Neo 3PDR ribbon tweeter

mounted in front of the Neo10 driver. The Z-62 is 7.7" high, and both drivers employ two 6.5" aluminum cone woofers with rubber surrounds. Contact [Peter@hoagland.us](mailto:Peter@hoagland.us) for further information.

**CAIG Laboratories'** new DeoxIT Wipes are solvent and VOC free, RoHS compliant, and come pre-saturated and individually packaged. They have a unique fast-acting deoxidizing solution that cleans, enhances, lubricates, and protects electrical conductivity on all metal connectors and contacts. Deoxit, which acts as a lubricant and assists with difficult or tight connects, dissolves the oxidation and sulfides along with dirt, dust, and grime as well as protecting against these foreign elements from reattaching to the metal surfaces. For more, please go to [www.deoxit.com](http://www.deoxit.com).

The CRM-2BIP on-wall bi-pole speaker, from **Sunfire Corp.**, contains a dual side-firing ribbon configuration which produces wide dispersion for a huge rear sound stage. Also featuring a compact 4.5 high back-emf woofer, the CRM-2BIP handles 400W power and uses Intelligent Tweeter Shaping, which tailors the speaker's high frequencies to the listener's tastes and/or the acoustics of the room. For additional information, contact [Peter@hoagland.us](mailto:Peter@hoagland.us) or [www.sunfire.com](http://www.sunfire.com).

**Monster Cable's** new Cable-It is a cable hiding solution that lets home theater owners finish their system off in style. From small to large sizes, Cable-It can hold between 3 and 13 cables, ranging up to 50'. If you'd like to learn more, contact Mike Schroeder at (212) 388-1400.

The **Cerwin Vega** Passive Series of professional non-powered subwoofers consist of the CVP-121 and CVP-118, capable of 4kW peak and 1400W peak, respectively. The CVP-121 features 32Hz frequency response, and a cast aluminum grille that functions as a heatsink for the sub's driver, while the CVP-118 has a maximum SPL of 131dB, featuring a singular pole cap that can accommodate up to two top boxes for maximum configurability. For additional information, please visit [www.cerwin-vega.com](http://www.cerwin-vega.com).

From **AudioQuest**, the ITC System's new gold-plated connectors feature a captive center pin that securely grips onto the center conductor using a unique spring-tension system for maximum contact and conductivity. Available in F, BNC, and RCA connector configurations for 18-AWG, 20-AWG, and 24-AWG coax cable, Instant Tool-less Connectors are easily reusable. More information is available at [www.itcplug.com](http://www.itcplug.com).

**Snell Acoustics** released the Model IC C7 In-Cabinet LCR and IW C7 in-wall LCR THX Ultra 2 Certified Loudspeakers, featuring the D'Appolito Array. Both feature 1" SEAS silk dome tweeters, two 4.5" SEAS treated paper midrange drivers, and two 8" copolymer cone woofers for dynamic bass response. The IC C7 is an acoustic suspension design, and the IW C7 has a solid aluminum, acoustic suspension enclosure with full bracing and asphalt damping, and a perforated steel grille. For more, go to [www.snellacoustics.com](http://www.snellacoustics.com).

sion enclosure with full bracing and asphalt damping, and a perforated steel grille. For more, go to [www.snellacoustics.com](http://www.snellacoustics.com).

## Lundahl Transformers in the U.S.

**K&K Audio** is now selling the **premier European audio transformers** in the U.S.

### New Lundahl Products

- Amorphous core tube power output transformers – SE or PP
- Special SE 845 output transformer
- Compact high inductance power supply chokes
- Tube line output transformer

### High-End Audio Kits

- RAKK DAC 24bit/192kHz D/A Converter w/ tube output stage
- MM/MC Phono Preamplifier
- MC Phono Step-up Unit
- Differential Line Stage Preamplifier
- Minimal Reactance Power Supply
- Tube Microphone Preamplifier

For more information on our products and services please contact us at:

# PEACH II

\$1,495

We've just introduced our new generation of the Peach line stage preamplifier. And, the new Peach II is just \$1,495 with remote control. This latest Peach is our best sounding ever. Clear, transparent, fast and naturally spacious sound. Check out these features:

- 4 inputs plus tape loop
- All relay switched
- Remote control
- High and low impedance output circuits (switchable)
- HT Bypass feature
- Tube rectified power supply
- 3-way volume/balance/sensitivity controls
- 6H30 gain stage
- AuriCap coupling capacitors
- Zero feedback design
- Massive power supply
- Available hand made walnut case

*All JuicyMusic products are designed and manufactured in the USA and sold only by JuicyMusic direct.*
