

Capable of withstanding direct exposure to all types of weather, the AC.17, from **Terra Loudspeakers**, is a three driver two-way system featuring dual 6.5" cast frame woofers and a 1.1" titanium dome tweeter. The AC.17 includes unique technical features such as Terra's Anodized Ceramic Aluminum Diaphragms, which make for very light, stiff, and responsive weather-proof cones, as well as a magnetic fluid centering system which eliminates the typical woofer spider. Every component of the AC.17 has been designed to remain rust and corrosion free. Multiple connector variations are available, as well as various color choices. For further information go to www.terraspeakers.com or 207-725-1005.

The Groove Master Phono Pre-amp is the newest product from **Colin Electronics**, and features vinyl playback with supreme transparency of tone and space, and 103dB dynamic range. To learn more, please visit <http://colinelectronics.com>.

The **Consumer Electronics Association** has released *The MRAV Guide*, from its DigitalTips.org website, which allows homeowners to take full advantage of music and video collections in all areas of their homes through multi-room audio/video. The guide follows a day in the life of the Johnson family using their MRAV system to bring the family together, and includes a printable checklist with step-by-step directions on how to speak with builders, contractors, and others involved in the process.

The SW-T2.1 1800 is a touch speaker system from **Genius**, which features an embedded equalizer so users can choose between all types of music. Also included are a line-in jack or head-phone jack, a 6" subwoofer, and an easy-to-use touch screen. For more, go to www.geniusnetusa.com/buy.php.

The SchmartSolder is a new tool from **Schmart-Board** that makes it simple to hand solder through-hole components. SchmartSolder are loops of solder produced in just the right diameter to fit over the component leads, which, once the solder is flush to the circuit board and touched by the soldering iron, melts and flows into the hole, making flawless, neatly soldered components. To see more, go to www.schmartboard.com/index.asp?page=resources_howto.

Parts Express, one of the top suppliers of audio, video, and speaker components, introduces its new line of **Dayton Audio** Cat5e/Cat6, coax and speaker cable. Perfectly suited for all types of applications, these installer grade products include the Cat 6, with 550MHz bandwidth, copper clad steel 18AWG center conductor, and range from 100 to 1000' lengths. For more information, visit www.parts-express.com.

Alcons' LR14/90 pro-ribbon line array is a passive two-way ultra compact module. It features a very compact design and maximum SPL of 130dB+ per unit, and has 800W peak power handling and crystal clear response. Frequencies below 1kHz are taken care of by two 6.5" neodymium mid-bass drivers, and the total system weight is 33 lbs. For more information, please go to www.alconsaudio.com and www.theribbonnetwork.net.
